### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 26 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

Claims 1-10 and 29-41 are presented for examination.

The allowance of claims 2-10, 29 and 41 is removed.

Applicants' response filed January 26, 2005 has been received and entered.

Accordingly, the rejections made under 35 USC 112, first paragraph and 35 USC 112, second paragraph as set forth in the previous Office action are hereby withdrawn.

### ***Claim Objections***

Claim 37 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-10, 29-36 and 38-41 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for treating rhinosininitis or alleviating the symptoms of rhinosinusitis with thapsigargin, does not reasonably provide enablement for other agents that permits the release of proteins from the endoplasmic reticulum or other agents disclosed in claims 29-36 and 38-41. The specification does not enable any person skilled in the art to which it pertains, or

with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims.

In this regard, the application disclosure and claims have been compared per factors indicated in the decision In re Wands, 8 USPQ2d 1400 (Fed. Cir., 1988) as to undue experimentation.

The factors include:

- 1) the quantity of experimentation necessary
- 2) the amount of direction or guidance provided
- 3) the presence or absence of working examples
- 4) the nature of the invention
- 5) the state of the art
- 6) the relative skill of those in the art
- 7) the predictability of the art and
- 8) the breadth of the claims

The instant specification fails to provide guidance that would allow the skilled artisan background sufficient to practice that instant invention without resorting to undue experimentation in view of further discussion below.

The nature of the invention, state of the prior art, relative skill of those in the art and the predictability of the art

The claimed invention relates to a method of treating rhinosinusitis or alleviating the symptoms of rhinosinusitis comprising administering an agent that

permits the release of proteins from the endoplasmic reticulum. The relative skill of those in the art is generally that of a Ph.D. or M.D.

The present invention is unpredictable unless experimentation is shown for the other agents that permits the release of proteins from the endoplasmic reticulum or the other agents disclosed in claims 29-36 and 38-41.

The breadth of the claims

The claims are very broad and inclusive to all and any agent that permits the release of proteins from the endoplasmic reticulum.

The amount of direction or guidance provided and the presence or absence of working examples

The working examples are limited to the administration of thapsigargin.

The quantity of experimentation necessary

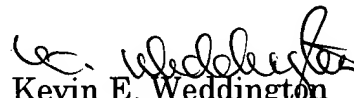

Applicants have failed to provide guidance as to how the other agents that permits the release of proteins from the endoplasmic reticulum or the other agents disclosed in claims 29-36 and 38-41 is effective in treating rhinosinusitis or alleviate its symptoms. The level of experimentation needed to determine the other agents that permits the release of proteins from the endoplasmic reticulum or the other agents disclosed in claims 29-36 and 38-41 would be able to treat rhinosinusitis is undue. Therefore, undue experimentation would be required to practice the invention as it is claimed in its current scope.

Claims 1-10, 29-36 and 38-41 are not allowed.
